SHINING WATERS

PERSONAL GREETINGS FOR 1940

My, how time does fly! Seems like only three months ago I was writing greetings for 1939. The older we grow, the faster the time seems to go. Well, here we are again offering you some of the finest bulbs we ever were able to grow. 1939 was the wettest year we ever experienced in our Glad growing career. Didn't see a thrip on the place during the whole season. Some growers think wet weather and thrips don't go together. Whether it was the weather or our constant alertness with Rototox and Tartar Emetic, the new spray, we don't know. Didn't have to resort to irrigation the entire season, but we do know we had a time keeping ahead of the grass and weeds. Took the help of two hired men and our new Ariens tiller, but we were rewarded with the finest crop of fine flowers we ever grew. Our display put on at the Citizens & Southern Bank, July 12, attracted more attention and favorable comments than any show ever staged in Atlanta. Ford's Glads were selected for decorating the bank the entire season. In our trial patch we had about 75 new varieties to test out. Some of the finer ones we are listing this year. Some other good ones in the bunch, not enough to offer this season. Hope we will be able to list several of them next season. Sorry, but many of the new much bragged about varieties did not come up to our requirements, and of course were discarded. We do not claim to offer all the good ones, but what we do offer can be depended upon to be of the best. Thus we can save you time and money by selecting your needs from this list and let the other fellow experiment with some of the new overrated ones. We are releasing three new ones this year: "Etta Bell" is our own seedling, while "Dixie Gold" and "Betty Ford" are Fred W. Gray seedlings, of which we control the entire stock. You will like them all. The prices are in reach of all Glad fans. In addition to these beautiful Glads we are listing our stock of fine Iris. We have a very fine collection, both the tall bearded and the new fall blooming series, which bloom in the spring and again in the fall till the frost gets them.

SHIRLEY TEMPLE
(From Small Bulbs)

AMONG THE WINNERS

Beautiful Ohio, as usual, did her stuff at Sioux City, Ia. Four blue ribbons, 1 red ribbon, Four Blue at Cedar Rapids; 1 blue at Elkhart; 2 blues at Boston, and 2 Blues at Akron, Ohio, State Show.

Mary Ansteen and Creve Coeur both awarded Blue Ribbons at Illinois State Show. They are all listed here at prices you can afford.

To insure our customers of clean, healthy bulbs, true to name, we are always on the alert for Thrips and Rogues. One day while looking over our patch of Picardy bulblets we found a rogue. Had the camera handy, took its picture. Turned out to be our Champion 1938 Seedling, James Richard. Just look at him peeping. Another glad fan in the making.

OUR 1940 RELEASES

ETTA BELL IN PERSON

Etta Bell is one of our own seedlings, a cross of Golden Dream pollen on Picardy, a beautiful golden buff overlaid pink, slightly ruffled. Been tested by several large growers. Etta Bell is a tall decorative type. Always straight spikes. Wasn't able to get a good picture. It is a medium propagator. Medium size bulblets that germinate easily. The stock is still scarce and price will not be reduced next year. Below is Etta Bell grown from bulblets planted this year.

PRICE OF BULBS

\$5.00
EACH

No Small Bulbs or Bulblets
to sell this year.

ETTA BELL (From Bulblets)

"Dixie Gold." Here is a Glad that's going places. Tested by American Legion trial gardens. Here is Mr. Linn's report: Height 64 in., head length 24 in., number of buds 20, open 7, in color 4. Size of floret $4\frac{1}{4}$ in. Was exhibited last year under number. Not in competition. Admired by everyone who saw it. "Dixie Gold" is just what the name suggests, a pure deep gold. Color of Prairie Gold with the red lines left out. A tall husky grower. Disease and insect resistant. Produces plenty of big fat bulblets that germinate easily, and make as fine large healthy looking bulbs as we have ever seen. You will make no mistake adding this one to your list and price is in reach of all.

Large or medium size bulbs, \$1.00 each. Bulblets 10c each. Special price to growers in quantity.

BETTY FORD AND
MAGNA BLANCA

“BETTY FORD.” Another seedling being offered for the first time. Its size and habits are similar to Dixie Gold, but its color is a deep rose red. Will be tested in several trial gardens this year. A strong healthy grower. Decorative type. Long flower head. Blooms properly spaced, and face outward. Spike nicely tapered. 20 buds, diameter $4\frac{1}{2}$ in., open 5, in color 6. This beautiful Glad always grows straight spikes. After being cut the last bud opens same color as the first one, doesn't fade or sun scald. Here is undoubtedly the finest rose red decorative ever produced. Didn't get a good picture of it. Didn't intend to introduce it until 1941, so we let the best ones get away. Makes fine red colored bulbs. Plenty of nice fat bulblets, easy to germinate. If you want a new one that's worth while, you will be pleased with Betty Ford.

Large bulbs \$1.00 each; bulblets 10c each. Price will not be reduced next year.

IRIS

In ancient mythology, Iris symbolizing the rainbow is often referred to as the "Goddess of the Rainbow." But she had no such important position on Olympus. She was the personal attendant of Juna, spouse of the great Zeus. Her name has been perpetuated in a great genus of plants, because of their unusual color quality. A shimmering changeability under varying lights and positions, which has given us the descriptive word "iridescent." This quality was contained in her garb, according to Virgil, who wrote: "Iris of saffron wings, displaying against the sun a robe of a thousand varying colors."

The first of the modern Iris was discovered in Asia Minor, ancient Troy, the Island of Cyprus and Mesopotamia. These were the parents of our present day Iris in several thousand varieties. We have spent several years in honest and diligent search to accumulate one of the finest collections in this country. Some collections are larger but none finer. Time for planting the tall bearded Iris in the North is in August, while in the Southern States, better to plant September 15 'till November 1st, as the hot dry weather is over and we have plenty of good cool growing weather for the rhizomes to get established before real winter sets in. Iris planted in the fall blooms profusely the following spring. During the blooming season our gardens are open to the public for the purpose of seeing the different varieties in bloom. This will enable you to make your selections of varieties for fall delivery. Much better than trying to select from a catalog description. In this respect we feel like an absolute failure, as the beauty of many of the newer varieties are indescribable. Every variety we list may be seen in bloom in their proper season. Visitors welcome.

AS OTHERS SEE US

Washington, D. C.,
July 5, 1939.

Dear Mr. Ford:

I want to thank you a thousand times for the perfectly beautiful flowers you sent. I don't think I have ever seen lovelier Gladioli.

Sincerely yours,

MRS. L. W. ROBERT, JR.

Dear Mr. Ford:

The Gladiolus Bulbs you sent us last spring were outstanding among our planting of several varieties. They made strong, fine stems and flowered beautifully over a long period. We are saving the bulbs from this season's crop in anticipation of the exquisite and massive coloring which this year's planting afforded us.

Sincerely yours,

W. E. IRELAND, Supt.

Dear Mr. Ford:

Am cutting blooms from the Picardy bulblets you sent. These have grown as vigorously as mature bulbs. I am certainly interested in what they do another year.

Sincerely,

E. A. LINNS, Service Officer.

Dear Mr. Ford:

The Glads I grew from your bulbs this year were fine. I showed at the Georgia Gladiolus Show. On eight entries I won six blue and two red ribbons, which I think is pretty good for an amateur.

Sincerely yours,

MRS. P. W. Y.

NEW PRICES

The prices on many varieties have been greatly reduced this year, and new ones are being offered at painless prices. Do not confuse these prices with those being offered on junk offered on bargain counters of dealers and department stores. These are clean, healthy bulbs, true to name and if given proper care will all bloom and perform beyond your expectations. If you are interested in larger quantities, will be pleased to make you a special quotation. High class bulbs delivered in small quantities can not be produced profitably for less. Some of our best customers are satisfied customers who have bought bulbs from us for several years. Give us a trial and we will try to please you.
